Public Notice Concerning Kansas / Federal
Water Pollution Control Permits and Applications

State of Kansas
Department of Health and Environment
Division of Environment-Bureau of Water
1000 SW Jackson St., Suite 420
Topeka, Kansas 66612-1367

Public Notice No. KS-AG-23-156/203
Public Notice No. KS-AG-R-23-015/018
Public Notice No. KS-Q-23-101/139
Public Notice No. KS-PT-23-011
Public Notice No. KS-EG-23-008/010
Public Notice No. KS-NQ-23-003

Telephone: (785) 296-6432 - Ag Permits
(785) 296-3056 - All Others

Beginning Date: July 6th, 2023
Comments Due: August 5th, 2023

In accordance with Kansas Administrative Regulations 28-16-57a through 63, 28-18-1 through 17, 28-18a-1 through 31 and 33, 28-16-150 through 154, 28-46-7, and the authority vested with the State by the administrator of the U.S. Environmental Protection Agency, various draft water pollution control documents (permits, notices to revoke and reissue, notices to terminate) have been prepared and/or permit applications have been received for discharges to waters of the United States and the state of Kansas for the class of discharges described below.

The proposed actions concerning the draft documents are based on staff review, applying the appropriate standards, regulations, and effluent limitations of the state of Kansas and the Environmental Protection Agency. The final action will result in a Federal National Pollutant Discharge Elimination System Authorization and/or a Kansas Water Pollution Control permit being issued, subject to certain conditions, revocation, and reissuance of the designated permit or termination of the designated permit.

Public Notice No. KS-AG-23-156/203

Pending Permits for Confined Feeding Facilities

<u>Name and Address of Applicant</u>	<u>Legal Description</u>	<u>Receiving Water</u>
J-Six Enterprises, LLC Summit Producers Company 292 Quivira Rd Marquette, KS 67464	SE/4 of Section 09 T18S, R05W McPherson County	Smoky Hill River Basin

Kansas Permit No.: A-SHMP-H001

Federal Permit No.: KS0086291

The proposed action is to modify and reissue an existing NPDES permit for a facility for 7,078 head (2,831.2 animal units) of swine weighing greater than 55 pounds and 8,720 head (872 animal units) of swine weighing 55 pounds or less, for a total of 3,703.2 animal units of swine. This permit is being modified to include additions to two existing buildings. There is no change in the permitted number of animal units from the previous permit. This facility has an approved Nutrient Management Plan on file with KDHE.

Ranger Feeders II, LLC

E/2 of Section 22 &

Upper Arkansas

144 S Ogallalah Rd
Dighton, KS 67839

W/2 of Section 23
T18S, R28W
Lane County

River Basin

Kansas Permit No.: A-UALE-C002

Federal Permit No.: KS0094471

The proposed action is to approve an update to the Nutrient Management Plan (NMP) received for this existing facility currently permitted for 3,220 head (1,288 animal units) of swine weighing greater than 55 pounds and 1,600 head (160 animal units) of swine weighing 55 pounds or less for a total of 1,448 animal units of swine. The facility's NMP was updated to include changes in application rate limitations for their fields. Three of the fields application rate limitation have become less restrictive than the previous NMP. There are no changes to the permit or in the permitted number of animal units. Only the updated portion of the Nutrient Management Plan is subject to comment. This facility has an approved Nutrient Management Plan on file with KDHE.

KRB Pork, Inc.
4th & Jade Rd

SE/4 of Section 10
T05S, R02E

Lower Republican
River Basin

Palmer, KS 66962

Washington County

Kansas Permit No.: A-LRWS-H007

Federal Permit No.: KS0094956

The proposed action is to approve an update to the Nutrient Management Plan (NMP) received for this existing facility currently permitted for 8,000 head (3,200 animal units) of swine weighing more than 55 pounds. The facility's NMP was updated to include changes in the application rate limitations for their fields. Two of the fields application rate limitation became less restrictive than the previous permit. There are no changes to the permit or in the permitted number of animal units. Only the updated portion of the Nutrient Management Plan is subject to comment. This facility has an approved Nutrient Management Plan on file with KDHE.

Dunn Swine, LLC
863 NW 10th Ave
St. John, KS 67576

NE/4 of Section 05
T23S, R13W
Stafford County

Lower Arkansas
River Basin

Kansas Permit No.: A-ARSF-H001

Federal Permit No.: KS0089958

The proposed action is to approve an update to the Nutrient Management Plan (NMP) received for this existing facility currently permitted for 1,855 head (742 animal units) of swine weighing more than 55 pounds and 2,675 head (267.5 animal units) of swine weighing 55 pounds or less; for a total of 1,009.5 animal units of swine. The facility's NMP was updated to include changes to the application rate limitations. The application rate limitation for one field has become less restrictive than the previous NMP. There are no changes to the permit or in the permitted number of animal units. Only the updated portion of the Nutrient Management Plan is subject to comment. This facility has an approved Nutrient Management Plan on file with KDHE.

Hanson Farming Co.
1009 X Rd
Pawnee Rock, KS 67567

NE/4 of Section 15
T20S, R16W
Pawnee County

Upper Arkansas
River Basin

Kansas Permit No.: A-UAPN-C007

Federal Permit No.: KS0093688

The proposed action is to approve an update to the Nutrient Management Plan (NMP) received for this existing facility currently permitted for 2,000 head (2,000 animal units) of cattle weighing more than 700 pounds. The facility's NMP was updated to include changes in application rate limitations for their fields. Three of the fields application rate limitation have become less restrictive than the previous NMP. There are no changes to the permit or in the permitted number of animal units. Only the updated portion of the Nutrient Management Plan is subject to comment. This facility has an approved Nutrient Management Plan on file with KDHE.

Bill Oats
Gottsch Feeding Corporation

Public Notice No.: KS-Q-23-101/139

The requirements of the draft permit public noticed below are pursuant to the Kansas Surface Water Quality Standards, K.A.R. 28-16-28 (b-g), and Federal Surface Water Criteria.

<u>NAME AND ADDRESS OF APPLICANT</u>	<u>RECEIVING STREAM</u>	<u>TYPE OF DISCHARGE</u>
Altamont, City of P.O. Box 305 Altamont, KS 67330	Deer Creek via unnamed tributary	Treated Domestic Wastewater

Kansas Permit No. M-NE01-OO01 Federal Permit No. KS0045918
 Legal Description: W½, SW¼, SE¼, Section 11, Township 33S, Range 19E of Labette County, KS
 Facility Location: 37.18029, -95.29419

The proposed action is to reissue an existing State/NPDES permit for an existing facility. The existing facility is a three-cell wastewater stabilization lagoon system with a minimum of 120 days detention time. The facility receives domestic wastewater from residential and commercial areas. The proposed permit contains limits for Biochemical Oxygen Demand, Total Suspended Solids, and Ammonia; as well as monitoring for pH, E. coli, and Total Phosphorus. This NPDES discharging lagoon wastewater treatment facility has been reviewed for eligibility for the MDV for ammonia and has been determined to be eligible. Eligibility was determined through analysis of the facility's highest attainable criteria (HAC) for ammonia. The ammonia effluent limit was determined on 3/3/2023 by calculating the 99th percentile ammonia value from the facility's discharge monitoring reports resulting in an ammonia limit of 4.8 mg/L for this facility. However, due to anti-backsliding, the ammonia limit of 4.5 will be applied.

Arma, City of P.O. Box 829	First Cow Creek via unnamed tributary	Treated Domestic Wastewater
-------------------------------	--	--------------------------------

Arma, KS 66712-0829

Kansas Permit No. M-NE03-OO01

Federal Permit No. KS0045926

Legal Description: SW¼, NE¼, Section 7, Township 29S, Range 25E of Crawford County, KS

Facility Location: 37.53779, -94.71160

The proposed action is to reissue an existing State/NPDES permit for an existing facility. The existing facility is a three-cell wastewater stabilization lagoon system with a minimum of 120 days detention time. The facility receives domestic wastewater from residential and commercial areas and industrial wastewater from local manufacturers. The detention time at design flow is 129 days. The proposed permit contains limits for Biochemical Oxygen Demand, Total Suspended Solids, and Ammonia; as well as monitoring for pH, E. coli, and Total Phosphorus. This NPDES discharging lagoon wastewater treatment facility has been reviewed for eligibility for the MDV and has been determined to be eligible for the MDV. The ammonia effluent limit was determined on 2/23/2023 by calculating the 99th percentile ammonia value from the facility's discharge monitoring reports, resulting in an ammonia limit of 9.2 mg/L for this facility. The 99th percentile monthly average decreased during the current permit cycle resulting in a lower limit for the proposed permit.

Legal Description: NE1/2 of Section 35, Township 34S, Range 17E of Labette County, KS
Facility Location: 37.0448, -95.5103

The proposed action is to issue a new State/NPDES permit for a new facility. This is a new limestone quarrying and crushing operation with no washing. Outfalls 001A, 002A and 003A consists of stormwater runoff, which will be treated by a sedimentation pond. The proposed permit contains generic language to protect the waters of the state. In compliance with Kansas and federal law, KDHE has approved an antidegradation review for this new facility for increased concentrations and mass of some pollutants to the receiving stream. The water quality of the receiving stream will not be lowered below the quality necessary to support existing designated uses.

Facility Location: 39.76158, -95.63287

The proposed action is to issue a new State/NPDES permit for a new facility. This facility is a groundwater extraction and treatment system installed to control and remediate the carbon tetrachloride contamination associated with USDA's former facility. The system will also remediate chloroform and ethylene dibromide. The proposed permit contains limits for Carbon Tetrachloride, Chloroform, Ethylene Dibromide, and pH; as well as monitoring for Flow, Nitrite + Nitrate, Carbon Tetrachloride, Chloroform, and Ethylene Dibromide. In compliance with Kansas and federal law, KDHE has approved an antidegradation review for this new facility for increased concentrations and mass of some pollutants to the receiving stream. The water quality of the receiving stream will not be lowered below the quality necessary to support existing designated uses.

Kansas Permit No. I-UA16-PO02

Federal Permit No. KS0080012

Legal Description: SE ¼ Section 9, Township 19 S, Range 14 W of Barton County, KS

Facility Location: 38.41001, -98.86978

The proposed action is to reissue an existing State/NPDES permit for an existing facility. This is a peaking natural gas fired steam electric power generating station which operates about 1-3 weeks in a year. Steam electric generating units #1 and #2 were permanently retired in 1983. Unit #3 has a generator nameplate rating of 82 megawatts. During operation of any unit or the auxiliary boiler, wastewater consisting of cooling tower blowdown, boiler blowdown, and floor drains is discharged to Dry Walnut Creek through Outfall 001A. The average design discharge is about 0.3 million gallons per day when the station is on-line and about 55 gpd when the station is off-line. Domestic waste is directed to a leach field. The proposed permit contains limits for Total Residual Oxidant and pH, as well as monitoring for Flow, Electric Power Generation, Temperature, Nitrate + Nitrite, Total Phosphorus, Sulfate, and Total Recoverable Selenium.

Arkansas River

Treated Domestic
Wastewater

Kansas Permit No. M-AR94-IO01

Federal Permit No. KS0043036

Legal Description: Center Section, Section 27, Township 28S, Range 1E of Sedgwick County, KS
Facility Location: Plant 1: 37.63414, -97.30793; Plant 2: 37.58564, -97.30697
Facility Address: 2305 E 57th Street South, Wichita, KS 67216

The proposed action is to reissue an existing State/NPDES permit for an existing facility. The existing facility is a mechanical wastewater treatment plant consisting of Plant 1: raw wastewater pumping, mechanical bar screen, and extraneous flow basin; Plant 2: raw wastewater pumping, mechanical bar screen, grit chambers, primary clarification, settled wastewater pumping, trickling filters, clarification, screw pumps, intermediate pumping station, activated sludge aeration basins, final clarification, UV disinfection, reaeration, gravity belt sludge thickener, belt filter press, anaerobic digestion, sludge

processing, dissolved air floatation sludge thickener, sludge screening, sludge storage, biofilter odor control system, and septage receiving station. The facility will conduct plant upgrades consisting of: mechanical bar screen, raw sewage pump station, vortex grit removal, primary clarifiers, settled sewage pump station, biological nutrient removal basin, aeration basins, ferric chloride storage tanks, supplemental carbon storage tanks, hydrocyclone facility, final clarifiers UV disinfection, reaeration, extraneous flow basin, sludge holding tanks, rotary drum thickeners, anaerobic digestion, digested sludge storage tanks, centrifuge dewatering, centrate storage tank and pump station, sludge storage building, biofilter odor control system, and septage receiving station. The facility receives domestic wastewater from residential and commercial areas and industrial wastewater from local manufacturers. The proposed permit contains limits for Biochemical Oxygen Demand, Total Suspended Solids, ammonia, E. Coli, pH, Dissolved Oxygen, nitrates, Total Phosphorus, and Whole Effluent Toxicity; as well as monitoring for Total Kjeldahl Nitrogen, Total Nitrogen, Total Phosphorus, and Chlorides. The proposed permit includes a Schedule of Compliance for facility improvements to address nutrient reduction which shall be completed by June 30, 2028.

Kansas Permit No. M-MO34-SU01

Federal Permit No. KSR410005

The proposed action is to issue a new individual NPDES Municipal Separate Storm Sewer System (MS4) permit from an existing MS4 general permit. The proposed MS4 permit requires the permittee to develop, implement, and enforce a stormwater management program designed to reduce the discharge of pollutants from the MS4 to the maximum extent practicable, to protect water quality, and to satisfy the appropriate water quality requirements of the Clean Water Act and Kansas surface water quality statutes and regulations. The proposed permit requires the permittee to update the Stormwater Management Program document, implement six minimum control measures and implement best management practices to reduce any identified total maximum daily load (TMDL) regulated pollutants if listed in the permit (TMDL Table). If there is an identified TMDL regulated pollutant, surface water monitoring may be required on the impaired water body to evaluate performance of the best management practices. Monitoring of industrial stormwater discharges and oversight of construction activities within the MS4 may be required if it is applicable. The proposed permit requires the submittal of an annual report that addresses all compliance requirements for the previous year.

Processed Wastewater

Facility Name: TC Energy Keystone Pipeline Milepost #14 Crude Oil Release Project

Kansas Permit No. I-BB21-PO02

Federal Permit No. KS0200012

Legal Description: Section 20 & 21, Township 02S, Range 04E of Washington County, KS
Facility Location: 39.861132, -96.996557

The proposed action is to issue a new State/NPDES permit for a new facility. The temporary wastewater treatment facility was constructed onsite for the purpose of treating impacted surface and groundwater from Mill Creek that resulted from the TC Energy Keystone Pipeline Milepost #14 crude oil spill on December 7, 2022. The facility consists of a granular activated carbon (GAC) system with a 5-acre of storage lagoons for remediation of surface water and groundwater of impacted portion of Mill Creek. The treatment system also includes an upstream 3-acre phase separation lagoons with a dissolved air flotation (DAF) unit. The wastewater treatment system removes crude oil and volatile organic compounds (VOCs) from crude oil-impacted surface water and groundwater. Both lagoons have single 60-mil synthetic liners. The proposed permit contains limits for Flow, Benzene, Daily Maximum (D.M.), Toluene, D.M., Ethylbenzene, D.M., Total Xylenes, D.M., Total Petroleum Hydrocarbons – Low-Range, Total Petroleum Hydrocarbons – Mid-Range Hydrocarbons, Total Petroleum Hydrocarbons – High-Range Hydrocarbons, Total Suspended Solids, Monthly Average (M.A.)/D.M., pH – Standard Units, Oil and Grease M.A./D.M., Total Arsenic, D.M., Total Barium, D.M., Total Chromium, D.M., Total Mercury, D.M., and Total Selenium, D.M.; as well as monitoring for Total Phosphorous, Total Lead, Total Copper, Total Nickel, Total Zinc, Total Molybdenum, Sulfate, and Total Cyanide.

via unnamed tributary

Processed Wastewater

Kansas Permit No. I-SO01-PO01

Federal Permit No. KS0200007

Legal Description: NW 1/4, Section 27, Township 3S, Range 16W of Phillips County, KS

Facility Location: 39.764022, -99.118872770

The proposed action is to issue a new State/NPDES permit for a new facility. This facility is a groundwater extraction and treatment system installed to control and remediate the carbon tetrachloride contamination associated with Commodity Credit Corporation (CCC)/USDA's former facility. Groundwater is pumped from three (3) extraction wells and conveyed to the treatment system via underground piping. The carbon tetrachloride will be removed from the extracted groundwater by an air stripper with tray aeration. Treated groundwater will then be conveyed through underground piping to an outfall structure. Treated water will be surface discharged to Turner Creek via Outfall 001A. The extraction wells are expected to produce a total of approximately six gallons per minute (gpm); the air stripper is designed to be capable of treating the contaminated groundwater at a slightly higher rate. The proposed permit contains limits for Carbon Tetrachloride and pH, as well as monitoring for Flow, Arsenic, Selenium, Total Phosphorus, Sulfate, and Nitrate. In compliance with Kansas and federal law, KDHE has approved an antidegradation review for this new facility for increased concentrations and mass of some pollutants to the receiving stream. The water quality of the receiving stream will not be lowered below the quality necessary to support existing designated uses.

Facility Address: 901 Canterbury Drive, Hays, KS 66201

Facility Location: 38.86807, -99.30008

The proposed action is to reissue an existing State/NPDES permit for an existing facility.

The proposed action is to issue a new State/NPDES permit for a new facility. This facility manufactures hydraulic control valves, cylinders, pumps and motors. Steel parts are processed in a 3-stage conversion coating operation, in the northeast part of the plant, to prepare the steel parts for paint. This is referred to as Outfall 001A, even though the regulated wastes from this process are normally directed to an on-site evaporator system and are not discharged to the city sanitary sewer. This facility also has a wash station for the aluminum impregnator and a valve wash station that cleans grey iron and ductile castings. These operations normally do not discharge to the city sewer and is designated as Outfall 002A, if they would discharge. The proposed permit contains limits for pH, Total Toxic Organics, Cadmium, Chromium, Copper, Lead, Nickel, Silver, Zinc, and Cyanide.

Public Notice No.: KS-EG-23-008/010

In accordance with K.A.R. 28-46-7 and the authority vested with the State by the administrator of the U.S. Environmental Protection Agency, draft permits have been prepared for the use of the well(s) described below within the State of Kansas.

NAME AND ADDRESS OF APPLICANT

Kanza Coop Iuka

P.O. Box 175

Iuka, KS 67066

INJ03:

Latitude: 37.7267066, Longitude: -98.728252

An application has been filed with the Kansas Department of Health and Environment (KDHE) for an aquifer remediation project which includes the use of injection wells INJ01, INJ02, and INJ03. Iuka, Kansas is located along U.S. Highway 281, approximately 6 miles north of Pratt, Kansas. The Kanza Cooperative Association is located in the extreme southern portion of the City of Iuka and was a grain storage facility. Carbon tetrachloride was first discovered in the groundwater at the site (previously known as the Iuka Cooperative Exchange) in December 1996. On December 14, 1998, the Iuka Coop entered the site into the Voluntary Cleanup and Property Redevelopment Program (VCPRP) under Voluntary Agreement No. 98VCP0031. Under the VCRP, the permittee withdraws contaminated groundwater, treats the groundwater using a granulated activated carbon (GAC) adsorption system, and is authorized to inject treated groundwater into the Quaternary alluvial aquifer. The proposed permit contains limits for Maximum Daily Wellhead Injection Pressure, Maximum Weekly Injection Volume, pH, Nitrate, and Carbon Tetrachloride.

Facility Name: Smoky Hill Army Range

Legal Description: SE¼, NW¼, SW¼, Section 23, Township 15S, Range 4W of Saline County, KS

The proposed action is to issue a new, non-discharging State/NPDES permit for an existing non-discharging facility. Two cell lagoon system with 31,000 sq ft surface area that received wastewater from an office building and barracks used sporadically. Synthetic HDPE liner installed = less than 0.1 in/day seepage (assumed 0). SCHEDULE OF COMPLIANCE: Within 60 days of the effective date of this permit, the facility shall have a KDHE-certified operator to supervise the operation of this facility in compliance with K.S.A. 65-4501 et seq. and K.A.R. 28-16-30 et seq. In compliance with Kansas and federal law, KDHE has approved an antidegradation review for this new facility for increased concentrations and mass of some pollutants to the receiving stream. The water quality of the receiving stream will not be lowered below the quality necessary to support existing designated uses.

Persons wishing to comment on or object to the draft documents and/or permit applications must submit their comments in writing to the Kansas Department of Health and Environment (KDHE) if they wish to have the comments or objections considered in the decision-making process. All written comments regarding the draft documents, application or registration notices received on or before **August 5th, 2023** will be considered in the formulation of the final determination regarding this public notice. Please refer to the appropriate Kansas document number (KS-AG-23-156/203, KS-AG-R-23-015/018, KS-Q-23-101/139, KS-PT-23-011, KS-EG-23-008/010, KS-NQ-23-003) and name of the applicant/permittee when preparing comments.

All comments received will be responded to at the time the Secretary of Health and Environment issues a determination regarding final agency action on each draft document/application. If response to any draft document/application indicates significant public interest, a public hearing may be held in conformance with K.A.R. 28-16-61 (28-46-21 for UIC). A request for public hearing must be submitted in writing and shall state the nature of the issues proposed to be raised during the hearing.

Comments or objections for agricultural related draft documents, permit applications, registrations or actions should be submitted to the attention of Casey Guccione, Section Chief, Livestock Waste Management Section at the KDHE Bureau of Environmental Field Services (BEFS), 1000 SW Jackson, Suite 430, Topeka, KS 66612. Comments or objections for all other proposed permits or actions should

be sent to Andrew Bowman at the KDHE, Bureau of Water, 1000 SW Jackson St., Suite 420, Topeka, KS 66612.

All draft documents/applications and the supporting information including any comments received are on file and may be inspected at the offices of the KDHE. For agricultural related draft documents or applications an appointment can be scheduled, or copies requested by contacting Mirina Landry at 1000 SW Jackson St., Suite 430, Topeka, KS 66612, telephone (785) 296-0076 or email at kdhe.feedlots@ks.gov. For all other proposed permits or actions an appointment can be scheduled, or copies requested by contacting Neal Niceswanger, Bureau of Water, 1000 SW Jackson St., Suite 420, Topeka, KS 66612, telephone (785) 296-6804 or email at Neal.Niceswanger@ks.gov. These documents are available upon request at the copying cost assessed by KDHE. Application information and components of plans and specifications for all new and expanding swine facilities are available on the Internet at <http://www.kdhe.ks.gov/livestock>. Division of Environment offices are open from 8 a.m. to 5 p.m., Monday through Friday, excluding holidays.

Janet Stanek
Secretary
Kansas Department of Health and Environment
