APPENDIX 9.2

CLIENT QUESTIONNAIRE AND INTERVIEW

ESA Guidelines / ESA User Questionnaire

AEC's clients rely on the ESA during real estate property transfers to demonstrate due diligent inquiry to qualify for the *innocent landowner* defense to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. As such, the ESA must be thorough and completed in a professional manner.

AEC performs ESA projects in general accordance with ASTM International standard E 1527-13, entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This standard provides the definition of a recognized environmental condition (REC), historical recognized environmental condition (HREC), and controlled recognized environmental condition (CREC). AEC will render professional opinions regarding the presence of these conditions with respect to the subject property at the time of inspection. ASTM defines these conditions as:

> A REC is *"the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative to a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*
>
> A CREC is *"… a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."*
>
> A HREC is "… *a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations institutional controls, or engineering controls)."*

The ASTM Standard requires the **user** to establish their knowledge of *recognized environmental conditions* in connection with the property. In order to meet this requirement, AEC requests that, you, our client, as the **user**, read and answer the following questions. When completed, please sign, date, and return this questionnaire to AEC. We will include the signed questionnaire in our report to assist you with completing your obligations under the ASTM standard, which support "*all appropriate inquiry*" determinations under 40 CFR 312. You may wish to consult legal counsel regarding your legal responsibilities in complying with this regulation or in satisfying the innocent landowner defense under CERCLA.

PROJECT REFERENCE:

Main Project Area:

Approximately 20,000 acres north of Highway 50 & west of Highway 77 in Marion County, Kansas.

1) *Environmental Liens:*
   Are you aware of, or do you possess, results from a search of recorded land title records (or judicial records where appropriate)[1] completed to date that identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

   Circle one: **YES** X **NO** **Do not know**

2) *Activity and Land Use Limitations (AULs):*
   Are you aware of, or do you possess, results from a search of recorded land title records (or judicial records where appropriate) that identify any AULs, such as engineering controls, land use restrictions or institutional

Circle one: **YES** X **NO** **Do not know**

3) *Specialized Knowledge or Experience of the User:*
Do you have any specialized knowledge or experience related to the property or nearby properties that indicate the existence of recognized environmental conditions (as defined above)?

Circle one: **YES** X **NO**

4) *Fair Market Value (if not refinancing):*
(a) Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

Circle one for (a) X **YES** **NO** **Do not know**

(b) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Circle one for (b): **YES** **NO** X **Not applicable**

5) *Commonly Known or Reasonably Ascertainable Information:*
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

Circle one: **YES** X **NO**

For example, as **the report's user**:
(a.) Do you know the past uses of the property?

Circle one for (a): **YES** X **NO**

(b.) Do you know of specific chemicals that are present or once were present at the property?

Circle one for (b): **YES** X **NO**

(c.) Do you know of spills or other chemical releases that have taken place at the property?

Circle one for (c): **YES** X **NO**

(d.) Do you know of any environmental cleanups that have taken place at the property?

Circle one for (d): **YES** X **NO**

6) *Obvious Indicators:*

Circle one: **YES** X **NO**

If YES, explain: _____

Site Narrative :

The former Farmers Grain Cooperative, now owned by Mid Kansas Cooperative, is a small agri-chemical facility dealing in dry and liquid fertilizers. Spill report complaints prompted the facility to build new storage containment systems. The North Central District Office had worked this site as a spill before it entered into the Voluntary Cleanup and Property Redevelopment Program. Several phases of VCI activites have indicated soil and groundwater contamination, with groundwater impacts extending offsite. In August 2010, additional wells were installed to determine the downgradient extent of the groundwater. KDHE has requested a Nitrate Presumptive Remedy work plan to address the soil impacts and continued groundwater monitoring during that time. Additional delineation of groundwater may also be needed. 05/24/2016: The May 2016 Semi-Annual Groundwater Monitoring Report (GWMR) was approved. Monitioring Well 4 (MW-4) was not sampled in October 2015 or May 2016 as gravel applied in the Fall of 2015 had covered the well and could not be located. Continued groundwater monitoring was recommended as concentrations of nitrate remain above maximum contamainant level (MCL) in groundwater for multiple wells both on and off site. 01/25/2017: 2016 GWMR received. Comment letter sent on 01/25/2017 requesting water well receptor survey, additional lines of evidence showing high background concentrations of nitrate, possible offsite delineation downgradient and a path forward for the site. 02/10/2017: Receptor Survey received. Approved on 03/14/2017. KDHE noted three PWS Wells not included in the Receptor Survey 03/07/2017: Response to KDHE comment Letter received. Meeting to discuss site on 05/25/2017. 2018: Environmental Use Control (EUC) application; Soil Waste Management Plan (SWMP) and Nitrate Background Report all currently under review with KDHE.

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

Reference: Environmental Site Assessment - Phase I
20,000 Acres North of Hwy 50 & West of Hwy 77 in Marion County, Kansas
AEC File No. P1905061

Dear Mr. Hopkins-Hoel:

Allied Environmental Consultants, Inc. (AEC) is pleased to submit this proposal to perform an Environmental Site Assessment (ESA) for Expedition Wind. This proposal presents our understanding of your needs, the scope of services to address those needs, and the associated fee.

STATEMENT OF UNDERSTANDING
As AEC understands, Expedition Wind is interested in the subject property having the following description:

Main Project Area:
Approximately 20,000 acres north of Highway 50 & west of Highway 77 in Marion County, Kansas.

Gen-Tie Area:
Running from the Main Project Area to Highway 77 then in the highway right of way to a site in Butler County, Kansas.

Furthermore, we understand that the property is unoccupied and vacant.

SCOPE OF SERVICES
AEC will complete the ESA using guidelines developed according to the ASTM International standard E1527-13 meeting all appropriate inquiry (AAI) requirements. As part of these guidelines, an AEC environmental professional or their designee will visit the site and prepare the report. An AEC Director will monitor the project for quality and standard compliance. The following tasks are part of this project.

Task 1 – Review of Environmental Database
AEC will perform a search of the environmental computer databases maintained by a national database research company for the subject property and immediate vicinity. The database research company routinely accesses state and federal agency files covering the entire nation. AEC will review the database report for environmental concerns at or near the subject property.

Task 2 – Review of Physiographic, Geologic, and Hydrogeologic Data
AEC will review publicly available documents regarding the geography and geology for the subject property's vicinity. Such documents may include water well and oil well databases, geological reports, and topographical maps, among others that describe past environmental practices, surface water concerns or groundwater depth and flow direction. These factors play a role in determining the overall concern of any environmental concerns recognized during this project.

Task 3 – Environmental Lien & Property Use Limitations
ASTM E1527-13 requires the environmental professional to review official property and/or judicial records regarding environmental liens and activity use limitations for the subject property. AEC understands that Expedition Wind has already acquired the environmental lien and activity use limitations for the subject property and will provide that to AEC.

Task 4 – Historical Review
AEC will review the historical aerial photography available through sources such as the local City/County Mapping/Planning Department, and the USDA Soil Conservation Service for past and current land use. We will also review city directories and fire insurance maps, where available, to help determine past uses of the site and surrounding area.

Task 5 – Site Inspection
We assume that a person knowledgeable of the property will be available for interview and escort during an on-site inspection. An environmental professional or their designee will visit the site and conduct a visual inspection for indications of past usage, surface spills, stressed vegetation, disposal, etc. We will take photographs (i.e., digital images) of the subject property and adjacent properties at the time of the visit. We will also compile notes regarding the on-site structures and features for use in our report. Specifically, we will visually review the property and adjoining properties for recognized environmental concerns (RECs). This inspection will not include evaluations for asbestos or lead-based paint, or confirmation of the presence of mold, unless specifically stated under Task 7.

Task 6 - Report Preparation / Project Deliverables
AEC will prepare and submit one (1) printed and bound copy of the Phase I ESA report of findings by US Postal Service and one (1) portable document file (pdf) by email. The environmental professional and an AEC director managing the project will sign each copy. AEC can prepare additional paper copies at a cost of $25.00 each.

Task 7 – Special Provisions
The client has not requested special provisions, or non-scope services, for this project. If the client requests additional services after issuing the notice to proceed with the Phase I, we will provide a separate cost estimate and complete the services as an addendum to the project, if approved.

Reliance
Property transactions often include a number of interested parties who wish to rely on the final report or be included as a party written into the report. There is no charge to include a third party in a Phase I ESA report *prior to* initial report publication and submittal. However, AEC will modify the text of the Phase I report previously submitted to a client to add an interested third party for an additional fee of $200.00. This fee does not apply to Phase I ESAs prepared to meet SBA requirements (which include an SBA-specific reliance letter as a deliverable). All other requested forms of reliance are subject to negotiation and agreement prior to proceeding with the Phase I ESA project.

CLIENT RESPONSIBILITIES
AEC requires the following information before we can initiate the title search and database research for the project:

- The physical address (if available) and/or the legal description for each property associated with the project.
- A person's name and contact information that will provide AEC access to the subject property.
- Environmental liens or Use Limitations documents recorded for the property.

If available, we also would like the following records for each property associated with this project:

- Water well permits, records, or analytical data;
- Records regarding all underground and aboveground storage tanks;

- Environmental permits (surface impoundments, RCRA, CAA, CWA, etc.); and,
- Safety Data Sheets for chemicals used at the property (if applicable).

A legal representative of Expedition Wind must complete, sign, and return the questionnaire included as Attachment 1 to this proposal to comply with ASTM standards and provide a legally defensible ESA document for the client. The signed form will be included in our report to you.

COST ESTIMATE AND SCHEDULE

AEC will complete the Phase I Environmental Site Assessment for a **lump sum fee of $4,600.00,** including travel and expenses. AEC will deliver the ESA report within 10 business days following receipt of notice to proceed and Client providing prompt access to the property for the site visit. This proposal, including the proposed fee is valid for a period of 30 days and is subject to change thereafter. AEC will invoice additional services, such as teleconferences or meetings with third parties to discuss our findings, on a time and materials basis at the applicable billing rates attached hereto.

Please review the attached Exhibit A - General Provisions for Professional Services and following Billing Rates Sheet which are attached to this proposal and will become part of the agreement between AEC and Expedition Wind (as "Client"), if this proposal is accepted. By accepting this proposal, the Client represents that you and/or your designees having the right-to-enter the properties stated herein for the purposes of conducting visual or intrusive inspections into the environmental conditions of said properties with such right-to-enter acquired from persons having ownership and/or control over said properties.

We hope this proposal is helpful in your evaluation of our services. If you are in agreement with this proposal, please sign and return one copy to our office. Should you have any questions or comments, feel free to contact us at your convenience.

Sincerely,
ALLIED ENVIRONMENTAL CONSULTANTS, INC.

ESA Guidelines / ESA User Questionnaire

ESA Guidelines / ESA User Questionnaire

AEC's clients rely on the ESA during real estate property transfers to demonstrate due diligent inquiry to qualify for the *innocent landowner* defense to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. As such, the ESA must be thorough and completed in a professional manner.

AEC performs ESA projects in general accordance with ASTM International standard E 1527-13, entitled *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This standard provides the definition of a recognized environmental condition (REC), historical recognized environmental condition (HREC), and controlled recognized environmental condition (CREC). AEC will render professional opinions regarding the presence of these conditions with respect to the subject property at the time of inspection. ASTM defines these conditions as:

> A REC is *"the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative to a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*
>
> A CREC is *"… a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."*
>
> A HREC is "… *a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations institutional controls, or engineering controls)."*

The ASTM Standard requires the **user** to establish their knowledge of *recognized environmental conditions* in connection with the property. In order to meet this requirement, AEC requests that, you, our client, as the **user**, read and answer the following questions. When completed, please sign, date, and return this questionnaire to AEC. We will include the signed questionnaire in our report to assist you with completing your obligations under the ASTM standard, which support "*all appropriate inquiry*" determinations under 40 CFR 312. You may wish to consult legal counsel regarding your legal responsibilities in complying with this regulation or in satisfying the innocent landowner defense under CERCLA.

GENERAL PROVISIONS
FOR PROFESSIONAL SERVICES

GENERAL PROVISIONS FOR PROFESSIONAL SERVICES

In consideration hereinafter set forth, Allied Environmental Consultants, Inc., its officers, directors, employees, agents, shareholders, and partners, (collectively "Allied") and Client, its officers, directors, employees, agents, shareholders, and partners (collectively "Client") agree as follows:

1. Statement of Work. Consultant will furnish the services of its environmental professionals and technicians necessary to perform the work described in the attached Proposal hereto and incorporated herein by reference. The attached Proposal will specify the time of performance, amount and method of payment and any other special conditions applicable to this project.

2. Performance: Allied agrees to perform the professional, environmental and technical services described in the attached Proposal in good faith under the terms and conditions set forth in this Agreement. Allied's responsibility is limited to work specifically performed by Allied for Client. Allied is not responsible for acts or omissions of Client, its officers, directors, employees or agents, or any third party not under the direct control of Allied. Allied's services will be performed, findings obtained, and recommendations prepared in accordance with professional standards and practices generally and currently accepted at the time and at the locality where services are rendered. Allied does not warrant that its services create or guarantee a specific result. The representations in this paragraph are in lieu of all warranties either expressed or implied.

3. Insurance: Allied and Client agree to each maintain statutory Worker's Compensation, Employer's Liability Insurance, General Liability Insurance, and Automobile Insurance coverage for the duration of this Agreement. Additionally, Allied will maintain Professional Liability Insurance for Allied's negligent acts, errors, or omissions in providing services pursuant to this Agreement. If a project is Design-Build, the Client and all subcontractors providing professional design or other services (e.g., architects, engineers, inspectors, etc.) shall maintain professional or similar liability insurance for claims arising from its negligent performance of said services. Proof of insurance shall be provided, upon request, prior to commencement of said services.

4. Differing Site Conditions: The conditions at the site are the property of the Client/Owner regardless of whether or not they could be identified by an investigation or exploration conducted according to the professional standard or care. A "Differing Site Condition" is a subsurface, hidden, latent, or physical condition at a project site/building not revealed by the site exploration, site investigation, or other information provided to the Client and which cannot reasonably be anticipated. Allied is not responsible for any subsurface or concealed conditions, utilities, structures or other obstructions (collectively hereinafter "Conditions") not identified by Client provided: (i).Allied is not required to investigate such conditions except as identified in the attached Proposal, and (ii) Allied performs the work in accordance with principles and practices generally and currently accepted at the time and in the locality where the services are rendered. If during the course of the work, Allied discovers differing site conditions, hazardous substances, pollutants, contaminants, or utilities on the site which were not disclosed prior to Allied's submission of the attached Proposal Letter; and this discovery materially increases the cost and/or schedule for Allied's services; then Allied shall be entitled to an equitable adjustment for additional fees, expenses, and time for performance. Accordingly, Client agrees to indemnify, including all costs and attorney's fees, and hold Allied harmless from all claims for Differing Site Conditions, provided Allied performs the services specified in the Contract in a manner reasonably conforming to the terms of the Contract and to the Standard of Care.

5. Force Majeure: The Client shall not hold Allied responsible for damages or delays in performance caused by force majeure, acts of God, or other acts or circumstances beyond the control of Allied, or that could not have been easily foreseen and prevented including, but not limited to fire, weather, floods, earthquakes, epidemics, war, riots, terrorism, strikes, and unanticipated site conditions.

6 Extra Work: Services not specified in the Scope of Services set forth in this Agreement or due to regulatory changes shall be considered "extra work." No "extra work" will be performed without additional compensation per a supplemental agreement.

7. Indemnity: To the fullest extent permitted by law, Allied and Client shall defend, indemnify and hold each other, their officers, employees, agents, insurers, sureties, and parent and affiliated

corporations, harmless from any and all losses, consequential damages, expenses (including but not limited to attorneys', consultants' and experts' fees), claims, suits, liabilities, fines, penalties, and remedial or clean-up costs arising out of or in any way related to each party's: (i) negligent or willful misconduct with regards to the performance of the Work; (ii) any breach of this Subcontract; or (iii) any negligent or willful act or omission by each party, their invitees, or any person performing Work directly or indirectly on behalf of each party, regardless of whether the other party is partially at fault. This indemnity and defense obligations shall apply to any claim against either party by any employee of the other party; and each party shall not assert as a defense in any suit by the other party to enforce obligations under this Article any immunity or other defense provided under any worker's compensation or other laws. Each party's obligations under this Article shall not be limited by any other provision of this Agreement or by any law. Any damages recoverable shall bear interest at the annual rate of 18%, or the highest rate allowed by law, if lower.

With the exception of losses or injury caused by the negligence of Allied, the Client also agrees:

a. To waive any claims of liability against Allied for injury or loss allegedly arising from the activities required by the study or from the discovery of the existence or possible existence of any hazardous substances, pollution or contamination of any type on or under the facility or any adjacent property whether resulting from previous or existing operations.

b. To waive any claims against Allied resulting from the inability to cure such conditions or otherwise achieve an agreement to consummate the sale or lease of the facility if currently contemplated.

8. Limitations of Liability: Notwithstanding the obligations in Paragraph 7, to the fullest extent permitted by law, Allied's total liability to Client is limited to the greater of $25,000 or two times Allied's fee, for any and all damages or expenses arising out of this Agreement from any cause(s) or under any theory of liability. In no event shall Allied be liable for consequential damages, including, without limitation, loss of use or loss of profits, incurred by Client or its subsidiaries or its successors, regardless of whether such damages are caused by breach of contract, willful misconduct, negligent act or omission, or other wrongful act of either of them.

9. Handling of Hazardous Materials: Client recognizes and agrees that Allied is not a "generator," "transporter," "owner," or "treater," of hazardous waste or hazardous materials nor is Allied an "owner," or "operator" of the job site (as all such terms are used and defined under state and federal laws). Allied shall have no responsibility for the transportation, storage, treatment, or disposal of contaminated or potentially contaminated waste materials or materials of any kind, whether or not directly or indirectly generated from Allied's performance of the services hereunder except as specifically set forth in the attached Proposal. Client shall be responsible for the proper treatment, storage, and/or disposal of any such materials.

Client warrants and guarantees that title, as between Client and Allied, to all hazardous materials, substances, pollutants, and contaminants originating or removed from the job site by Allied will remain in and with Client. Client further warrants and guarantees that, as between Client and Allied, it will not challenge the ownership of substances enumerated above by any means, including suits in state or federal court, arbitration or actions in any form.

10. Governing Law and Forum: Any dispute between the parties arising out of or relating to this Agreement shall be governed by Kansas Law. Good faith negotiation and mediation are express conditions precedent to the filing of any legal action. Mediation shall be conducted in accordance with the latest edition of the Construction Mediation Rules of the American Arbitration Association.

11. Termination Without Default. If at any time during the performance of services hereunder, (a) Client requires Allied to stop work or (b) Allied, in its sole discretion, is of the opinion that (i) continuation of work would create an unnecessary or unreasonable safety and/or health risk to its employees or others or (ii) sub surface conditions and/or contaminants differ significantly from conditions, events, or contaminants which were reasonably foreseeable at the time this Agreement was executed, then this Agreement shall be

deemed complete and terminated. Upon such termination, neither party hereto shall have any further liability to the other with respect to this Agreement, except for any moneys currently owed to Allied at the time of termination; any expenses which cannot be avoided as a result of termination; and return of or submission of any materials to Client in Allied's possession which are to be returned to Client under the terms of this Agreement. Such termination shall not be considered a default by either party.

12. Payment: Client shall be obligated to pay all undisputed labor costs and project costs as agreed to in the scope of work, as follows: (a) project labor fees itemized in lump sum, hourly, or unit price format; (b) project costs such as (but not limited to) rental of special equipment (and necessary fuel, if any), analytical testing, subconsultants, subcontractors, vendors, special supplies, field supplies, and incidental parts and equipment necessary to complete the work etc.; (c) project reimbursable expenses such as (but not limited to) overnight employee expense (meals-motel-incidentals), vehicle mileage, rental vehicles (and necessary fuel), public agency fees, taxes, extraordinary costs of reproducing documents or publishing reports and deliverables, and postage, if any, associated with the scope of work, with itemization of these costs. All (b) project costs will be marked up 10%, and all (c) reimbursable expenses will be passed through at direct cost. The Client authorizes Allied to pay all bills associated with the scope of work, whether incurred by Allied or the Client. All project costs and reimbursable expenses related to the work shall be included in the monthly bills as additional costs.

Billing shall be upon project completion or monthly, whichever is less. Outstanding balances shall be due within 30 days from the date of invoice and subject to a late charge of 1.50% per month or the maximum allowed by law, whichever is less. Late charges shall be added for all amounts past due and re-billed after 30 days.

Collection of all undisputed amounts due Allied by the Client shall be at the Client's expense. Allied may enforce a lien against documents in Allied's possession acquired by its services, in accordance with Kansas law. Allied shall be entitled to recover reasonable expenses, including attorney's fees, incurred in collecting amounts billed pursuant to this Agreement, whether or not a lawsuit is brought.

Invoice items subject to dispute by the Client, whether fees, costs, or expense, shall be segregated by both parties for resolution, and all other fees, costs, and expense shall be promptly paid in accordance with this Agreement. Disputed items shall then be resolved by negotiation between the parties involved.

13. Entire Agreement: The terms and conditions set forth herein constitute the entire understanding of the parties relating to the services to be provided by Consultant to client as described in the attached Proposal. All previous proposals, offers, and other communications relative to the provisions in the services by Consultant, oral or written, are hereby superseded, except to the extent that they have been expressly incorporated herein. Any modifications or revision of any provisions hereof or any additional provisions contained in any purchase order, acknowledgment, or other form of Client are hereby expressly objected to by Consultant and shall not operate to modify this Agreement. This Agreement shall take effect upon acceptance and execution by both parties.

Any individual executing this document in a representative capacity represents and warrants that the individual possesses the authority to execute the document on behalf of the named principal.
