Tonya,

Thanks for keeping me in the loop on all of this.

The SHPO and I consulted on the new location, and the Santa Fe Trail Assoc. through its local Chapter concurs with the SHPO findings. While we would really rather have the tower the 3/4 mile away per the FCC rules, the proposed Site Coordinates of 38-32-36.2 N, 97-13-19.1 W are acceptable because the tower owner has made a good faith effort to reduce impacts on the viewshed of the Santa Fe Trail by moving the tower, consistent with topographical constraints, while keeping the tower on the same parcel ownership.

I will plan to attend and speak during the Planning and Zoning meeting, as an opportunity to raise awareness of the importance of the Santa Fe Trail in Marion County, and to support the proposed tower project.

Best regards,

Steve Schmidt

We will probably not have the report until the end of September due to the new FCC filing rules. There is a new National Notice Posting you have to do and it adds 45 more days to your process. Since we moved the tower, we had to start over. You will have to put this as a condition for the permit.
