Emma and Sharon,

Please find attached my comments on the proposed Article 27 Amendments addressing WCES regulations. I would like to have my comments formally entered into the public input on these proposed regulations. I plan on attending the Dec 9 meeting.

I am attaching copies of the documents I reference in my proposed Section 14.c.3.(c). I will attach most of them to this e-mail, and one to a following e-mail because of concern over file size.

I do need to revise the documents referenced in my proposed 14.c.3.(c).(1) and 14.c.3.(c).(2) as I have only recently obtained the LiDAR data and have not had opportunity to add that data to those two references.

You will note that I have structured the comments on the Santa Fe National Historic Trail to not try to tell people what they can and cannot do. Instead the objective is to make sure that the history and heritage of the Santa Fe Trail is thoughtfully considered in the development process and decisions.

For your information I am also attaching the Santa Fe Trail Association's policy regarding wind farms. I would also like that be become part of the public record.

I hope you will keep the attachments on file for reference on any projects of any type in the County that may impact the Santa Fe National Historic Trail.

Thank you.

Steve Schmidt
