RE: Proposed Alltel Tower

To Whom it may concern:

Recent discussions between Alltel Communications, Inc. and Marion County 911 Services have concluded that Marion County 911 Services wishes to place antennas on a proposed Alltel Communication Tower that will be under consideration at a Public Hearing on October 25, 2007.

It is Alltel's position that this request can be accommodated provided that:

- 1) The cell tower location is approved by Marion County Planning and Zoning.
- 2) All other permits required by Alltel for construction of a tower are received and Alltel actually builds the tower.
- 3) Marion County 911 Services enters into a Standard Antenna Lease Agreement with Alltel for a nominal fee of \$100.00 per year.
- 4) Marion County 911 Services agrees to abide by the Rules and Safety Specifications for installation and maintenance for Tower Tenants.

Due to the fact of short notice for this request by Marion County 911 Services, Alltel recommends that Marion County Planning and Zoning approve the application for the Conditional Use Permit contingent upon the execution of a Lease Agreement between Alltel and Marion County 911 Services, prior to the issuance of the Building Permit.

Thank you for your consideration on this important matter and we look forward to helping Marion County enhance their wireless capabilities.
