To the Marion county zoning committee,

I would like for you to know that in reference to the proposed cell phone tower near ^{Log} Boessel, my son Darcy and I farm the land on which it is to be built and are definitely in favor of it being built on the proposed site. We have had numerous people in the area say that they are glad to see that some thing is being done to improve our cell phone service.

I am unable to attend the public hearing on this but I along with many others in this community would love to see this approved.
